

Animal Friends

illustrated by
Samit Shrestha

There are many animals
that help humans.

The bright red rooster
crows loudly each morning
and tells the farmers it's
time to get up.

Guard dogs work hard to protect the house of these people.

Those sharp teeth would surely frighten away any intruders.

Carrier pigeons can take messages over a long distance in very remote places. They have an internal map that helps them to find home.

There are many types of tropical birds that people keep as pets.

They learn to talk and sing very well, and get very attached to their keepers.

A weaver bird is a very clever animal. It takes stems and leaves, and intertwines them together to make it's wonderful tear drop nest.

Humble earth worms are very important for our crops. They loosen the soil around the roots of the plants and make it easier for them to grow.

The camel is also called 'Ship of the Desert' because it is so good at walking in the sands in some of the most desolate places in the world.

Without bees to help, the plants could not make seeds. Bees help by taking pollen from one flower to another.

And best of all, they make us a sweet honey treat.

S8

Bookbot books are free, high quality decodable readers based on the order of sounds introduced by the **Bookbot Scope & Sequence**.

We're delighted to offer them to you to download and print at no cost. But it would be great if you could link to our page **www.bookbotkids.com/free-books** from your school's website so others can enjoy our free books.

We believe in creating an extensive library of decodable readers to inspire and bring confidence to children learning to read. You can find out about our mission at **www.bookbotkids.com**.
