

AN UNOFFICIAL MINECRAFT SERIES

DR. CAN DO

NOT
DONE
YET!

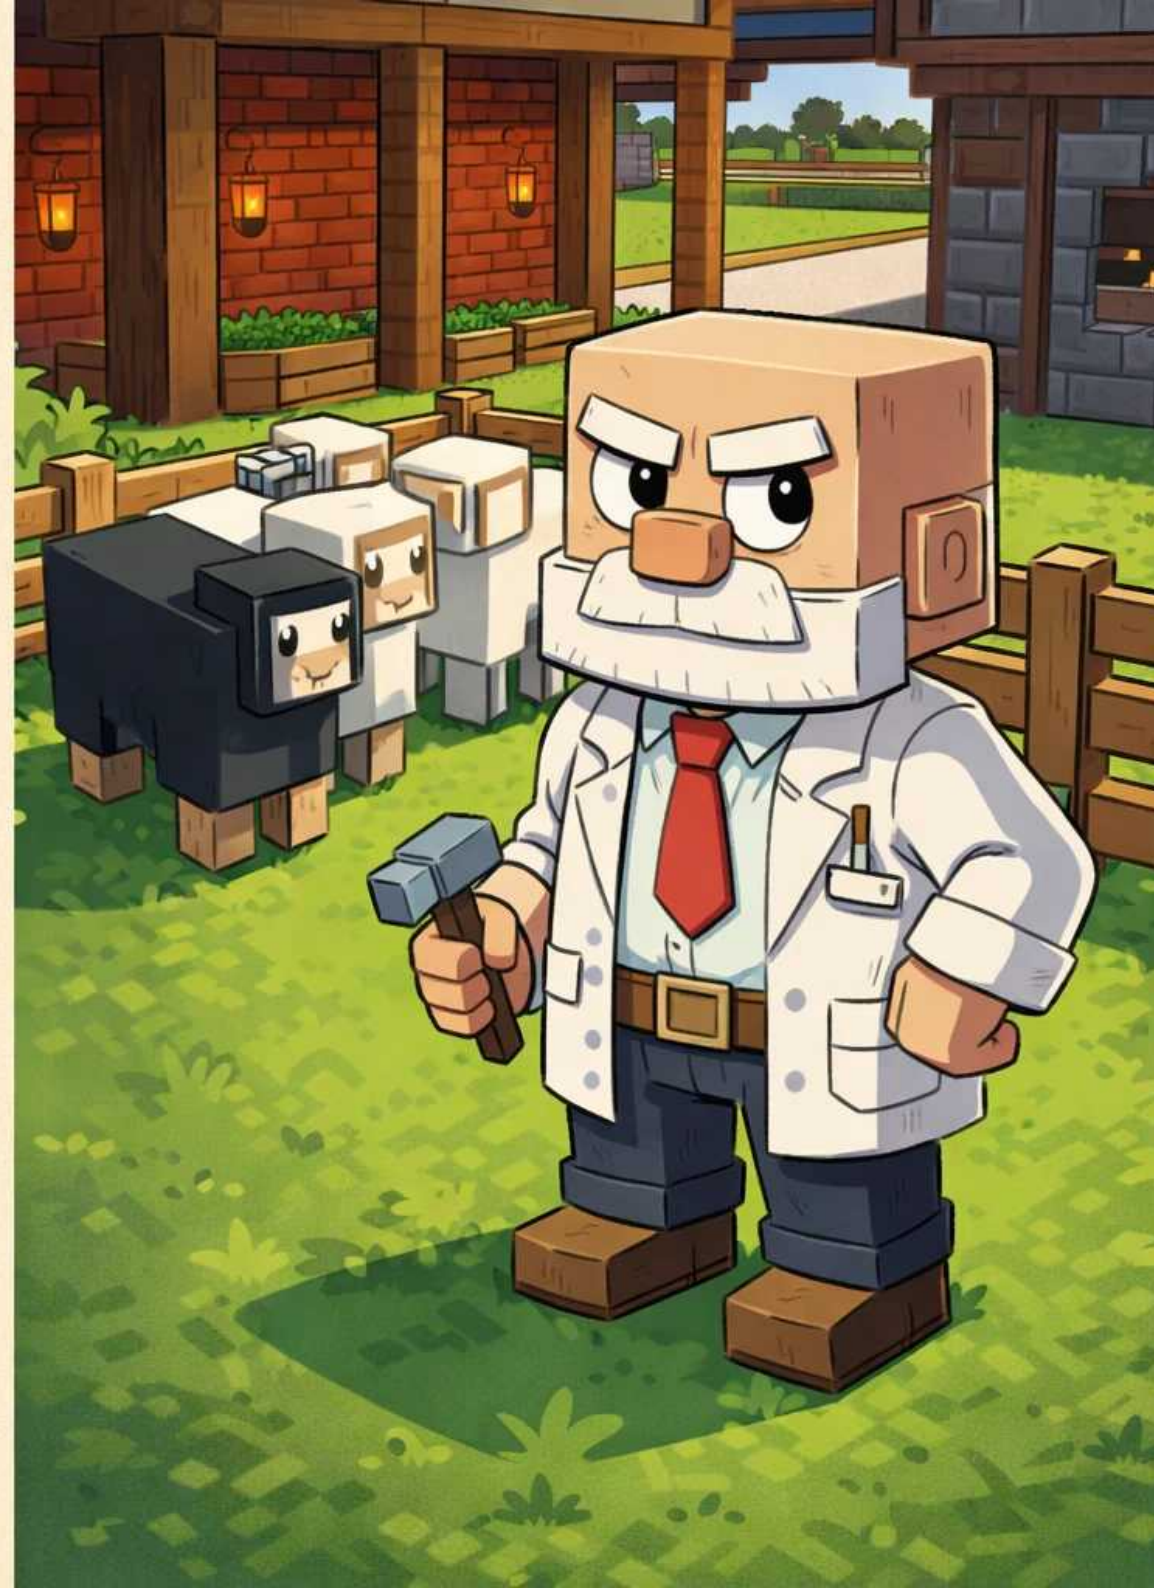

When Dr. Can Do arrived in the **village**, he had a **huge** idea. He could make every home better than before.

Standing in a cozy stone **cottage**, he pointed at a soft carpet on the floor. "I made this from sheep's wool," he said. "**Imagine** what we could do with a whole flock!"

Out by the **village** barn, a **large** flock of sheep grazed behind a wooden fence. A black sheep stood in the middle of the group, **wedged** between two white ones.

Shearing them all by hand took so much **energy**. There had to be a way to **manage** the job without doing it all himself. What if a machine could do the shearing instead?

Dr. Can Do built a **gentle** machine that did the job. Now the sheep spent a short time in glass **cages** inside a warm barn, while the machine gathered their wool. Lanterns glowed between each **cage**, keeping the animals calm.

He was kind and swapped the sheep over so none stayed too long. Soon he had **huge** piles of wool in every color you could **imagine**.

"Why not give a **villager** this job?" Jill said, standing with Dr. Can Do on the **village** path near a wooden shed. "You could hire a shepherd to look after the wool."

"That's a **genius** idea!" Dr. Can Do said. "We'll build a **large** Wool Shop on the **edge** of the **village**, where a shepherd can run the whole thing."

The **orange** sunrise crept above the **ridge**, and Dr. Can Do was already at work. He stood at the **edge** of a flat patch of dirt, planning where each wall and beam would go.

This hut would be **giant**, with **huge** shelves to store all the wool.

When the Wool Shop was finished, a man passing by stepped inside and spotted the loom. He took up the job on the spot, becoming the new shepherd.

He stood by his loom, with a **large** pile of bright red wool around him and warm lantern light above. When Jill brought him a bundle of wool, he smiled. With a kind **gesture**, he handed her a shiny green **gem** in return.

Later, Dr. Can Do stopped by the Wool Shop to see how the shepherd was **managing**. Inside, fresh bundles arrived from the barn, and the shepherd added each one to a growing pile beside his loom. It felt like **magic**. Soon there would be enough wool to **change** every home in the **village**.

Dr. Can Do stood in a cozy **cottage**, smiling at the **change** all around him. Colorful paintings hung on the walls, and a soft carpet covered the floor.

"Now I have **huge** stacks of wool left over," he said, looking out the window. "Enough to build a **giant** windmill! Think of what it could do!" From somewhere outside, Jill called back, "Don't you ever take a holiday?"

Not Done Yet!

Dr. Can Do has a brilliant plan for every cottage in the village - warm carpets, cozy floors, and piles of wool in every color you can imagine! But shearing a whole flock by hand takes so much energy. Could a gentle machine help? And what happens when his friend Jill suggests hiring a villager to run a brand-new Wool Shop? This decodable reader practices soft g words such as 'gentle,' 'huge,' 'village,' 'gem,' and 'imagine.'

Reading Skills: **Soft g**

cage, cages, change, cottage, edge, energy, gem, genius, gentle, gesture, giant, huge, imagine, large, magic, manage, managing, orange, ridge, village, villager, wedged

Learn to read with confidence

The Bookbot app and its carefully designed decodable books help children practise the sounds and words they are learning, building strong phonics and reading skills one step at a time. In the app, children can listen to stories read aloud, follow highlighted words as they are spoken, and read independently when they are ready. Together, the decodable books and oral reading support help develop accuracy, fluency, confidence and a love of reading. Learn more at www.bookbotkids.com.
